

## Vorträge Frühjahrssemester 2024

Jeweils Mittwoch, 16:30 Uhr, Hörsaal EG 16  
Departement für Chemie, Biochemie und Pharmazie (DCBP)  
Freiestrasse 3, 3012 Bern

13.03.2024

[Prof. Dr. Stefan Hecht](#) (SCS Lecture Series)  
Humboldt-Universität zu Berlin, Center for the Science of Materials Berlin  
*Macromolecular and supramolecular systems and their assembly /  
integration into materials*

21.03.2024

Thursday

[Prof. Dr. Jonas C. Peters](#) (in cooperation with SCS)  
California Institute of Technology, Resnick Sustainability Institute  
*Reductive PCET Mediators for Electro- and Photoelectrocatalysis*

11.04.2024

Thursday

[Prof. Dr. Kazuaki Ishihara](#) (SCS Lecture Series)  
Nagoya University, Graduate School of Engineering  
*Rational Design of High-performance Catalysts Based on Acid–Base  
Combination Chemistry*

01.05.2024

[Prof. Dr. Malte Oppermann](#)  
University of Basel, Department of Chemistry  
*Ultrafast Chirality: Capturing the Stereochemistry of Excited States with  
Time-resolved Circular Dichroism*

15.05.2024

[Prof. Dr. Marinella Mazzanti](#) (in cooperation with [PhD Coalition](#))  
EPFL, Institute of Chemical Sciences and Engineering (ISIC)  
*Dinitrogen Activation and Functionalization Seen from the Bottom of  
the Periodic Table*

06.06.2024

Thursday

(new date)

[Prof. Dr. Charlotte K. Williams](#) (SCS Lecture Tour)  
University of Oxford, Department of Chemistry  
*Using Catalysis to Make and Recycle Polymers*
